

Brüche addieren

$$\frac{1}{2} + \frac{1}{3} = \frac{5}{6}$$

Hauptnenner (kgV)

$$kgV(2, 3) = 6$$

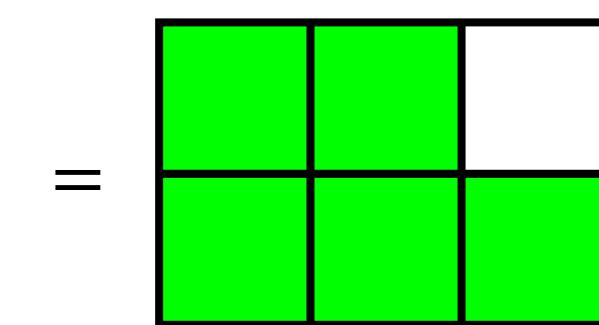

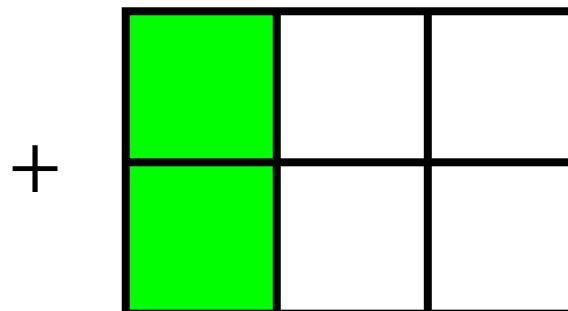

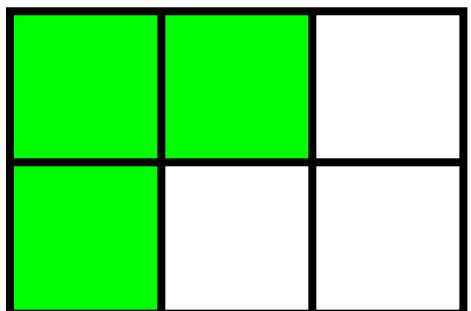

Erweitern

$$\frac{1}{2} = \frac{3}{6} \quad \frac{1}{3} = \frac{2}{6}$$

Addieren

$$\begin{aligned} \frac{3}{6} + \frac{2}{6} &= \frac{3+2}{6} \\ &= \frac{5}{6} \end{aligned}$$

Beispiele

$$\frac{2}{5} + \frac{3}{7} = \frac{29}{35}$$

Hauptnenner (kgV)

$$kgV(5, 7) = 35$$

Erweitern

$$\frac{2}{5} = \frac{14}{35} \quad \frac{3}{7} = \frac{15}{35}$$

Zähler addieren

$$\begin{aligned}\frac{14}{35} + \frac{15}{35} &= \frac{14 + 15}{35} \\&= \frac{29}{35}\end{aligned}$$

$$\frac{1}{4} + \frac{2}{3} = \frac{11}{12}$$

Hauptnenner (kgV)

$$kgV(4, 3) = 12$$

Erweitern

$$\frac{1}{4} = \frac{3}{12} \quad \frac{2}{3} = \frac{8}{12}$$

Zähler addieren

$$\begin{aligned}\frac{3}{12} + \frac{8}{12} &= \frac{3 + 8}{12} \\&= \frac{11}{12}\end{aligned}$$
